Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed, after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) Responsive to communication(s) filed on 16 January 2007.
 2a) This action is FINAL. 2b) This action is non-final.
 3) Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

DETAILED ACTION

1. Currently, claims 1-4 are pending in the instant application. The amendment filed 1/16/2007 has been entered. Finality of the previous office action is withdrawn. The following rejection is newly applied, accordingly, this action is NON-FINAL.

2. The rejections made in the previous office action under 35 USC 112/first paragraph and 35 USC 103 are moot in view of the amendment to the claims filed 1/16/2007.

Claim Objections

3. Claims 2-4 are objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. Independent claim 1 has been amended to recite "consisting of" language, which is considered "closed". Accordingly, the additional material claimed in claims 2-4 does not further limit claim 1. It is suggested that claims 2-3 be written in independent form. For claim 4, it is suggested that claim 1 be amended to recite "and optionally, wherein each probe is attached to a bead" or alternatively, it is suggested that claim 4 be written in independent form.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

5. Claims 1-4 are rejected under 35 U.S.C. 102(a) as being anticipated by Affymetrix GeneChip Human Mapping 10K array (product Data Sheet, 2003; pages 1-4).

The instant claims are drawn to an array consisting of 25 bp probes for mapping over 10,000 human SNPs. The Human Mapping 10K array is taught to be a genotyping tool for investigating 11,500 human SNPs. The array is taught to have more than 500,000 features, a feature consisting of more than 1 million copies of a 25 bp oligonucleotide probe of defined sequence. For each SNP, the array is taught to tile 40 different 25 bp oligonucleotides, with a slight variation in perfect matches, mismatches and flanking sequence. Although the product sheet does not teach the sequences of SEQ ID NOS 1-124,031, as stated in the MPEP in chapter 2100:

Where the claimed and prior art products are identical or substantially identical in structure or composition, or are produced by identical or substantially identical processes, a prima facie case of either anticipation or obviousness has been established. In re Best, 562 F.2d 1252, 1255, 195 USPQ 430, 433 (CCPA 1977). "When the PTO shows a sound basis for believing that the products of the applicant and the prior art are the same, the applicant has the burden of showing that they are not." In re Spada, 911 F.2d 705, 709, 15 USPQ2d 1655, 1658 (Fed. Cir. 1990).

Accordingly, as the array is applicant's own work, the office has sound basis for believing that the array taught in the prior art and that claimed in the instantly pending claims is the same. It is noted that the instant application claims priority to provisional application 60/417,190, however the instantly claimed array does not appear to be supported by the disclosure of the '190 application.

6. No claims are allowed.

Patent applicants with problems or questions regarding electronic images that can be viewed in the Patent Application Information Retrieval system (PAIR) can now contact the USPTO's Patent Electronic Business Center (Patent EBC) for assistance. Representatives are available to answer your questions daily from 6 am to midnight (EST). The toll free number is (866) 217-9197. When calling please have your application serial or patent number, the type of document you are having an image problem with, the number of pages and the specific nature of the problem. The Patent Electronic Business Center will notify applicants of the resolution of the problem within 5-7 business days. Applicants can also check PAIR to confirm that the problem has been corrected. The USPTO's Patent Electronic Business Center is a complete service center supporting all patent business on the Internet. The USPTO's PAIR system provides Internet-based access to patent application status and history information. It also enables applicants to view the scanned images of their own application file folder(s) as well as general patent information available to the public.

For all other customer support, please call the USPTO Call Center (UCC) at 800-786-9199.
